Course Description

Working at heights includes any job where there is a chance of you being injured by falling from one level to another, like falling off a roof. Any person who is working at heights needs training, clear work instructions and must use fall prevention and safety equipment.

This unit is appropriate for those working in operational roles where they are required to perform work at heights. The course examines the skills and knowledge required to work safely at heights in the Resources and Infrastructure Industries.

Course Outcomes

In this course you will learn about:

- Planning out the work.
- Choosing and installing safety equipment.
- Working at heights safely.
- Cleaning up the work area after you have finished.

Upon successful completion of this course, the learner will receive a Statement of Attainment.

Course Assessments

Competency is obtained through both theory and practical assessments. The practical assessment requires you to demonstrate the skills required to be deemed competent. The theory assessment will be undertaken in a written form.

If you feel you will be disadvantaged by undertaking a written assessment, please discuss with your trainer/assessor prior to beginning the theory assessment.

Admission

All attendees MUST have a USI (Unique Student Identifier). We are unable to issue a credential unless a valid USI has been provided.

You will need to apply for a USI prior to the course or be prepared to apply for one on the day (in which case a Driving License and Medicare Card is required).

Attendance

The course will be delivered from our training centre at 31 Whyalla Street, Fishwick, ACT. Safenet can also deliver this course in-house by request.

The duration for this course is 8 hours split into 2 x 4 hour sessions (1 week apart).

There is a 15 minute break for morning or afternoon tea.
